3 OPERATING THE URC

Normal Operation

Once you have set up the URC for your A/V equipment, it works like your original remote controls. To operate, just aim it at your equipment, press an appropriate device mode key and invoke the desired function by pressing a corresponding key on the URC. The indicator flashes during signal transmission and as confirmation of key touch.

Punch Through

Punch through allows you to operate TV's volume and mute functions without having to switch the device modes repeatedly even when your URC is in other operating modes.

4 ADVANCED OPERATION

Secondary Function

Symbols of secondary function are printed in different colors on the panel, and a SECONDARY FUNCTION TABLE is included in the interior page of the coversheet. To invoke a secondary function, press **SHIFT** followed by a corresponding function key.

5 MAINTENANCE

1. Do not expose your URC to dust, strong sun light, humidity, high temperature, or mechanical shock.
2. Do not use old and new batteries together as old batteries tend to leak.
3. Do not use corrosive or abrasive cleansers on your URC.
4. Keep the unit dust free by wiping it with a soft, dry cloth.
5. Do not disassemble your URC, it contains no user-serviceable parts.

6 TROUBLESHOOTING

- A. Check whether you have pressed the corresponding device mode key for your device.
- A. If the batteries are low, replace the batteries.
- Q. If several Device Codes listed under the brand of my A/V device, how can I select the correct Device Code?
- A. To seek the correct Device Code for your A/V device, test the code one by one until most keys work properly.
- Q. My A/V equipment responds only to some of the commands.
- A. You have set a code for which only some commands work properly but some do not. Try other codes until most keys work properly.
